

VGS

VISIBLE GEL SYSTEM

Thorogood's VGS Visible Gel System adds state-of-the-art cushioning to lightweight performance footwear. Absorbing shock with every step, the InterActive Cushioning System improves comfort and reduces repetitive impact stress where it's needed most – in the heel. The key is a unique VGS gel heel unit that won't deflate like an airbag and never loses cushioning power. It's been tested to withstand 300 foot pounds per square inch versus the standard 75 lbs of pressure resistance available in most competing footwear. Adding to the sheer comfort of this breakthrough footwear is a single density polyurethane and memory foam removable cushion footbed that cradles the entire foot and enhances breathability.

- ▲ InterActive Cushioning System. Unlike air bags, you can actually feel the entire gel heel comfort system. **Cannot pop or deflate like air bags can.**
- ▲ The gel heel unit is covered by a single density polyurethane and memory foam cushioned footbed. **This is the most comfortable and breathable footbed in the uniform industry.**
- ▲ Exclusive Thorogood Slip Resisting Traction rubber outsole with compression molded EVA mid for athletic performance, comfort, flexibility and lasting durability.
- ▲ Full grain polishable leather.
- ▲ Non-metallic construction and design.
- ▲ Cushioned insole on flexible rubber midsole for true athletic performance.
- ▲ Molded rubber heel stabilizer for ankle support.
 - Select styles have the Thoro>dri™ WATERPROOF system and are blood borne pathogen compliant
 - Advanced breathable heavy duty Nylux lining system to wick away moisture.
